## **Blueprint RF Brings Smart IT to Hospitality**

*- Convergence of Innovation -*

Atlanta (January 20) – Technology has transformed the guest experience, and now Blueprint RF is transforming hotel technology through the convergence of facilities management and IT innovation. With the launch of Blueprint RF, hotels can experience the capabilities of technology beyond simple Internet connectivity and explore the possibilities of the cloud with smart IT services and products.

Led by industry innovators, Arol Wolford, Ron Peterson, and James Tubo, Blueprint RF leverages the expertise of technology, hospitality and construction and design experts to supply high-level consulting services and product development specific to the hospitality industry.

“Technology has the capability to truly transform hotel operations and bring new players to the table to best utilize technology on a daily basis,” said Ron Peterson, Blueprint RF, CEO. “With Blueprint RF, the network becomes the central nervous system of the hotel allowing for access and control over multiple systems to best optimize resources as needed.”

The company’s business platform is built upon a next-generation server application, Dominion, that manages multiple and complex features within a seamless architecture creating the next network technology plateau for the hospitality industry. Through the Dominion server, Blueprint RF, offers a single seamless solution that meets hotel brand standards for broadband and creates a smart IP backbone that can be expanded as needed to support additional services throughout the property. Clients using the server will have the benefit of intelligence reporting and constant support and monitoring by experienced staff.

Blueprint RF has leveraged decades of experience and relationships to address one of the greatest needs of hotel operations to cut wasteful energy spending. The Dominion server is the gateway for a hotel to gain greater control over guest broadband access and the entire property when coupled with smart IT equipment.

Hotels will receive unparalleled access to a Blueprint RF’s exclusive team of industry experts that offer complete end-to-end implementation, planning, design, configuring consultation and around the clock support services designed to specifically meet the needs of the hospitality industry.

Blueprint RF supplies smart IT services to the hospitality industry with proprietary solutions and services that integrate technology with hotel design to heighten the guest experience. The company combines the experience by industry innovators from the technology, design and construction and hospitality industries to bring unparalleled expertise to hotels and brands.
