

OUR PROMISE TO YOU

Turn-key Network Delivery

Here's our 5-step process that shows how we build a relationship with you.

1. Discovery

Our goal here is to understand your Internet needs and company technology objectives.

2. Physical Site Survey, Network Plus

Our certified engineers visit your properties to study usage patterns, so we can design a Wi-Fi network to meet your needs.

3. Project Installation

Our in-house project management and engineering teams oversee equipment provisioning, circuit integration, on-site engineering, cabling and more.

4. Quality Assurance Testing, Routine Reporting

Dashboard keeps you on top of your network's connectivity through on-screen displays that give you an easy-to-read, real-time view of your Wi-Fi network.

5. Support Services

Our Help Desk is 24/7/365, and our nationwide network of 300+ certified technicians can arrive at any customer site within either 4 or 24 hours.
